Paper 1 Short Answer and Essay

May/June 2017

MARK SCHEME

Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **11** printed pages.

Question	Answer	Marks
1(a)	<p>Define the term 'leadership'.</p> <ul style="list-style-type: none"> A definition that suggests that 'leadership is the motivation of people towards achieving a common objective or goal' should be awarded 2 marks. Other answers might focus on leaders providing vision, direction, inspiration, strategy, for a business and could be awarded 2 marks if developed. Definitions that just refer to the motivation of staff worth 1 mark <p>Do not accept definitions of 'management' – which is said to be about setting objectives, organising resources, co-ordinating staff.</p> <p>A list of types of leadership – 0 marks</p> <p>Sound definition (2 marks) Partial definition (limited understanding) (1 mark) No creditable content (0 marks)</p>	2
1(b)	<p>Briefly explain <u>two</u> styles of leadership.</p> <p>There are said to be four distinct styles of business leadership:</p> <ul style="list-style-type: none"> Autocratic – all decisions taken by leader – staff supervised closely, one-way communication – little information given to staff. Democratic – participation encouraged, two-way communication, sharing of information, feedback encouraged – involvement of staff in decision-making. Paternalistic – leader assumes he/she is in a better position than staff to know what is best for the organisation, some consultation but final decisions taken by leaders – no true participation in decision-making. Laissez-faire – much of decision-making made by the workforce, arms-length approach – the reverse of autocratic leadership – lots of delegation within very broad limits. <p>Sound explanation of two leadership styles (3 marks) Sound explanation of one leadership style or partial explanation of two (2 marks) Partial explanation of one leadership style or a list of two (1 mark) No creditable content (0 marks)</p>	3

Question	Answer	Marks
2(a)	<p>Define the term 'debt factoring'.</p> <ul style="list-style-type: none"> A definition that suggests that when a business sells its debts / invoices to a debt-factoring / third party company should be awarded 2 marks. The idea of selling debts only should be awarded 1 mark <p>Sound definition (2 marks) Partial definition (limited understanding) (1 mark) No creditable content (0 marks)</p>	2
2(b)	<p>Briefly explain how leasing might be used by a business to improve cash flow.</p> <ul style="list-style-type: none"> Leasing – is obtaining the use of (but not necessarily purchasing) equipment or vehicles from a leasing or finance company – assets are acquired over the medium term paying a rental charge over a fixed period but not having to purchase the asset at the end of the period. Leasing avoids the need to raise what may be significant amounts of capital to buy assets with a positive impact on net cash flow Leasing companies may maintain and update equipment with leasing Many answers refer to businesses leasing out unwanted assets and thus increasing cash flow which is equally acceptable. <p>Note: Sale and lease back approach is also acceptable.</p> <p>Sound explanation of how leasing can improve the cash flow of a business (3 marks) Limited explanation of how leasing can improve the cash flow of a business (2 marks) Understanding of leasing. (1 mark) No creditable content (0 marks)</p>	3

Question	Answer	Marks
3	<p>Explain the possible benefits of mass customisation to a computer manufacturer.</p> <ul style="list-style-type: none"> • Mass customisation is a production process where there is a flow production of products with many standardised components but with flexible equipment – often computer controlled that allows for variations in the product – the production process is supported by a flexible and multi-skilled workforce. • There are low unit costs due to the flow production but also a flexibility to meet customers' individual requirements. • A business using mass customisation can produce a variety of products and use a focused or differentiated marketing approach and achieve higher added value. • A computer manufacturer can, using mass customisation, make a customised computer to meet customer specific needs in just a few hours. By changing just a few of the key components of computer production – and keeping the rest standard, low unit costs are achieved with greater product choice. • The technology of mass customisation gives a computer manufacturer the advantages of high volumes combined with the ability to make slightly different products for different markets. <p>Effective explanation of mass customisation and possible benefits to a computer manufacturer (4–5 marks) Limited explanation of mass customisation and possible benefits. (2–3 marks) Limited understanding of mass customisation or explanation of only either mass production or customisation (1 mark) No creditable content (0 marks)</p>	5
4(a)	<p>Define the term 'demand'.</p> <ul style="list-style-type: none"> • A sound definition is 'Demand is the quantity/amount that consumers are willing/able to buy at a given price (or in a particular time period).' <p>Sound definition given (2 marks) Partial definition given (limited understanding) (1 mark) No creditable content (0 marks)</p>	2

Question	Answer	Marks
4(b)	<p>Briefly explain <u>two</u> factors that could influence the demand for restaurant meals.</p> <p>Influencing factors could include:</p> <ul style="list-style-type: none"> • the price / cost of a restaurant meal compared to other customer expenditure options. • the relative increase / decrease in customer discretionary income. • the state of the (local) economy in terms of employment, wage and salary levels, recession or economic prosperity. • the price / cost of substitute products / services (food and drink price levels) / changes that might encourage home eating and meals. • availability and range of restaurant options, quality of meals and service. • degree of advertising / promotion, special offers, BOGOF etc. • the location of a restaurant • the time period of the meal, busier at lunch and dinner. <p>A range of factors – some customer orientated – some market orientated – some macro-economic orientated.</p> <p>Note: Some candidates may interpret the question in terms of the demand for a ‘particular’ restaurant... such a response is to be rewarded as a perfectly legitimate answer... factors such as the reputation of that restaurant, its chef, its prices, its distinctive food, its USP such as celebrity patronage etc.</p> <p>Sound explanation of two factors affecting demand for restaurant meals (3 marks)</p> <p>Sound explanation of one factor or partial explanation of two factors (2 marks)</p> <p>Partial explanation of one factor or a list of two (1 mark)</p> <p>No creditable content (0 marks)</p>	3

Question	Answer	Marks																		
5(a)	<p>Analyse problems a business could experience in its first year of trading.</p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Good analysis of problems a new business could experience in its first year of trading.</td><td>7–8</td></tr> <tr> <td>3</td><td>Some analysis of problems a new business could experience in its first year of trading.</td><td>5–6</td></tr> <tr> <td>2</td><td>Some explanation of problems a new business could experience in its first year of trading.</td><td>3–4</td></tr> <tr> <td>1</td><td>Understanding of problems for a new business.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content</td><td>0</td></tr> </tbody> </table> <p>Answers could include a focus on the need to:</p> <ul style="list-style-type: none"> • establish and build a customer base of loyal returning customers. • establish itself in the market. • effectively manage cash flow – generate sufficient working capital. • establish good relations with suppliers. • follow an effective pricing strategy that allows the business to compete effectively. <p>Failure to achieve such objectives likely to lead to problems of:</p> <ul style="list-style-type: none"> • lack of cash and working capital • uncompetitive production • inability to effectively market the business • insufficient demand to survive • failure to secure external finance • inability to repay start-up capital <p>Credit to answers that might include analysis of how significant these problems might be and/or briefly how they might be solved.</p> <p>Note: Some candidates may focus on the word trading in the question and this can then be developed into problems of trading internationally but must retain focus on a business in its first year.</p>	Level	Description	Marks	4	Good analysis of problems a new business could experience in its first year of trading.	7–8	3	Some analysis of problems a new business could experience in its first year of trading.	5–6	2	Some explanation of problems a new business could experience in its first year of trading.	3–4	1	Understanding of problems for a new business.	1–2	0	No creditable content	0	8

Question	Answer	Marks																		
5(b)	<p>Discuss whether market research will reduce problems that might be experienced by a new start-up business.</p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Effective evaluation of whether market research could reduce problems faced by a new start-up business.</td><td>9–12</td></tr> <tr> <td>3</td><td>Limited evaluation of whether market research could reduce problems faced by a new start-up business.</td><td>7–8</td></tr> <tr> <td>2</td><td>Analysis and some application of whether market research could reduce problems faced by a new start-up business.</td><td>3–6</td></tr> <tr> <td>1</td><td>Understanding of market research and / or new start-up businesses.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content</td><td>0</td></tr> </tbody> </table> <p>Answers might well use material presented in section (a) to focus on some problems that might face a new start-up business:</p> <ul style="list-style-type: none"> • Answers might then define market research and methods of market research. • Ways in which new business problems could be reduced by market research could include (prior to start-up and in the early period of trading.) • Better understanding of your target market. • Identify and keep up with market trends. • Set realistic targets for sales and revenue. • Make better informed marketing decisions (4Ps). • Better identify specific problems – sales fall due to new competitor, or substitute produce now available. • Identify new business opportunities. <p>Answers might well use Primary and Secondary market research methods as a framework for answering this question. Credit to be given as this approach supports and provides a relevant response.</p> <p>Market research then has the potential to provide more accurate information / data relating to potential customers, existing and potential competitors / products, marketing opportunities – that may well reduce risk and facilitate more confident business decision making.</p> <p>It is, however, expensive (particularly primary market research) and new start-up businesses may not have the finance or the inclination to engage in extensive market research.</p> <p><i>ALSO not all problems experienced by a new start up business will be problems that can be solved by market research e.g. the internal management of the new business may be inadequate, sudden changes in the external environment may present significant problems for a new business such as recession and new competition, new technology etc.</i></p>	Level	Description	Marks	4	Effective evaluation of whether market research could reduce problems faced by a new start-up business.	9–12	3	Limited evaluation of whether market research could reduce problems faced by a new start-up business.	7–8	2	Analysis and some application of whether market research could reduce problems faced by a new start-up business.	3–6	1	Understanding of market research and / or new start-up businesses.	1–2	0	No creditable content	0	12
