Paper 1 Short Answer and Essay

May/June 2017

MARK SCHEME

Maximum Mark: 40

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **10** printed pages.

Question	Answer	Marks
1(a)	<p>Define the term ‘price skimming’.</p> <p>Price skimming is a pricing strategy which involves setting a relatively high price for a product or service: one mark.</p> <p>For a second mark answers could include the following:</p> <ul style="list-style-type: none"> • The price is then lowered (over time) • It is a new product or a differentiated product • The product has a low price elasticity of demand • In order to seek a high level of profit/sales/demand • To recover any investment (such as R&D) <p>Sound definition (2 marks) Partial definition – limited understanding (1 mark) No creditable content (0 marks)</p>	2
1(b)	<p>Briefly explain why a business might use a price skimming strategy.</p> <p><i>Answers could include:</i></p> <ul style="list-style-type: none"> • To exploit the distinctive attributes of a new product in the market • To create consumer perception of high quality • To maximise short term profits on such a differentiated product/service • To recover any investment (such as R&D) • To exploit an inelastic demand for a product/a monopoly position <p>Sound explanation of why a business might use a price skimming strategy (3 marks) Limited explanation of why a business might use a price skimming strategy. (2 marks) Some understanding of a price skimming market situation. (1 mark) No creditable content (0 marks)</p> <p>Note: Some candidates may incorrectly define price skimming in part (a). For example they define penetration pricing. In this case they will have received 0 marks in part (a) but if they then accurately explain in part (b) why businesses might use penetration pricing strategy they can then be awarded maximum 2 marks.</p>	3

Question	Answer	Marks
2(a)	<p>Define the term ‘window dressing’ with reference to published accounts.</p> <p>Window dressing is where company accountants present their published accounts in a very favourable way to shareholders/investors in order to give the appearance of a well-run company and/or to attract more investment.</p> <p>Sound definition given (2 marks) Partial definition given (1 mark) No creditable content (0 marks)</p>	2
2(b)	<p>Briefly explain how window dressing might limit the usefulness of published accounts.</p> <p>Answers could include:</p> <ul style="list-style-type: none"> Published accounts may be ‘window dressed’ to give a minimum amount of information - significant information is not disclosed so important information is not included in the published accounts. Published accounts may be ‘window dressed’ to give a boost to the short term performance of a business and hence a misleading and inaccurate statement is given. This window dressing may well be legal but has the effect of reducing the accuracy and reliability of published accounts. Comparability with previous year’s accounts and with competitor accounts is compromised. In consequence the usefulness of ‘window dressed published accounts can be significantly undermined e.g. the ability to monitor, evaluate, and call to account a business through examination of published accounts is weakened. <p>Answers might also give examples of how window dressing could be practised.</p> <ul style="list-style-type: none"> postpone paying suppliers so that period end cash appears higher than it should be. sell assets at the end of the financial year to give more cash and improve liquidity position. reduce the amount of depreciation of fixed assets to increase declared profit. record an unrealistically low ‘bad debts’ amount. giving stock values a higher value than they are really worth. accelerating revenues from a future period into the current period. <p>Sound explanation of how the usefulness of published accounts could be limited by window dressing. (3 marks) Limited explanation of how the usefulness of published accounts could be limited by window dressing. (2 marks) Understanding of window dressing or published accounts. (1 mark) No creditable content (0 marks)</p>	3

Question	Answer	Marks
3	<p>Explain why corporate objectives are important to a business.</p> <p>Answers could include:</p> <p>This question seeks information and comment on objectives at the corporate level and some reference to importance.</p> <p>Objectives are important at every level of a business – gives focus and clarity – allows control and review of operations.</p> <p>Corporate objectives – are designed to make specific the aims and mission of a business – they provide a much clearer guide for management and workforce action throughout a business.</p> <p>They are set at the highest level of a business – examples include: profit maximisation, market share, growth, return on investment, cash flow, sales revenue, shareholder value, corporate image and reputation.</p> <p>Importance:</p> <ul style="list-style-type: none"> • they express the aims, purpose and mission of a business. • the main, and primary, business objectives. • set the frameworks and guidelines for all activities in a business. <p>Effective explanation of corporate objectives and their importance (4–5 marks) Limited explanation of corporate objectives and their importance (2–3 marks) Understanding of business objectives. (1 mark) No creditable content (0 marks)</p>	5

Question	Answer	Marks
4(a)	<p>Define the term ‘emotional intelligence’.</p> <p>The ability of managers to understand their own feelings or emotions and those of the people they work with.</p> <p>Sound definition given (2 marks) Partial definition given (limited understanding) (1 mark) No creditable content (0 marks)</p>	2
4(b)	<p>Briefly explain two of Goleman’s emotional intelligence competencies.</p> <p>Answers could include:</p> <ul style="list-style-type: none"> • self-awareness – ability to recognise and understand personal emotions and their effect on others – having a realistic self confidence in personal abilities. • self-management – ability to control own emotions, impulses – recover quickly from stress – being trustworthy and conscientious, show initiative and self-control. • social awareness – having empathy, sensing what others are feeling – take views of others into account, establish relations with a wide range of different people. • social skills – proficiency in building relationships and networks – ability to find common ground, build rapport – effective in leading change, building and leading teams – being persuasive and understanding <p>Sound explanation of two competencies (3 marks) Sound explanation of one competency or partial explanation of two (2 marks) Partial explanation of one competency or a list of two (1 mark) No creditable content (0 marks)</p>	3

Question	Answer	Marks																		
5(a)	<p>Analyse why a business needs to be accountable to its stakeholders.</p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Good analysis of why a business needs to be accountable to its stakeholders.</td><td>7–8</td></tr> <tr> <td>3</td><td>Some analysis of why a business needs to be accountable to its stakeholders.</td><td>5–6</td></tr> <tr> <td>2</td><td>Some explanation of why a business needs to be accountable to its stakeholders.</td><td>3–4</td></tr> <tr> <td>1</td><td>Understanding of stakeholders/accountability.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content</td><td>0</td></tr> </tbody> </table> <p>Answers may include:</p> <p>A definition of stakeholders – people, groups of people who have an interest in, or are affected by, what a business does and stakeholder theory.</p> <p>Stakeholder accountability may then be analysed as different stakeholders having different demands of a business:</p> <ul style="list-style-type: none"> • customers – quality/safe products – competitive pricing – ethical selling practices – demanded. • employees – job security, safe working practices, training, minimum wages – demanded. • suppliers – prompt, regular payments – fair treatment - demanded. • local community – environmental consideration, secure jobs – demanded. • government – pay taxes, observe laws, publish accounts – required. • Shareholders – if a plc, shareholders will have concern for dividend levels and share price. <p>Good answers will use stakeholder theory and illustrate with examples of different kinds of accountability to stakeholders</p>	Level	Description	Marks	4	Good analysis of why a business needs to be accountable to its stakeholders.	7–8	3	Some analysis of why a business needs to be accountable to its stakeholders.	5–6	2	Some explanation of why a business needs to be accountable to its stakeholders.	3–4	1	Understanding of stakeholders/accountability.	1–2	0	No creditable content	0	8

Question	Answer	Marks																		
7(b)	<p>Discuss the advantages and disadvantages for a manufacturing business of using the Just in Time (JIT) method of inventory control.</p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Effective evaluation of the advantages and disadvantages of using a JIT method of inventory control for a manufacturing business.</td><td>9–12</td></tr> <tr> <td>3</td><td>Limited evaluation of the advantages and disadvantages of using a JIT method of inventory control for a manufacturing business.</td><td>7–8</td></tr> <tr> <td>2</td><td>Analysis and some application of the advantages and/or disadvantages of using a JIT method of inventory control for a manufacturing business.</td><td>3–6</td></tr> <tr> <td>1</td><td>Understanding of JIT / inventory control.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content.</td><td>0</td></tr> </tbody> </table> <p>Answers could include:</p> <p>Description of a JIT system of inventory control – a demand-pull system of production that means a business produces only what is required, in the correct quantity at the correct time, so that inventory is kept to a minimum. A carefully planned scheduling and flow of resources through the production process and supplies are delivered right to the production / consumption line only when needed.</p> <p>Advantages</p> <ul style="list-style-type: none"> • Funds not tied up in inventory can be used elsewhere • Storage areas can be used for more productive processes • Potential quicker response to customer demand and greater potential output/production • Defect rates reduced, less wastage, greater customer satisfaction • Parts used in production may be newer, more up to date, and at lower cost <p>Disadvantages</p> <ul style="list-style-type: none"> • Expensive to introduce JIT in a business. • Opens a business to a number of risks especially those associated with the supply chain. • A minor disruption in production from just one supplier can force a manufacturer to stop production at very short notice. • Toyota had a fire in its supplier of brake parts and had to stop production within 3 days losing \$15 billion as a result. <p>Discussion should give relevant examples of benefits and potential disadvantages in a manufacturing context.</p> <p>Evaluative comments might well include reference to an assessment of risk for a business of using JIT and that it may well depend on the nature of a business and its relationship with stakeholders especially suppliers.</p>	Level	Description	Marks	4	Effective evaluation of the advantages and disadvantages of using a JIT method of inventory control for a manufacturing business.	9–12	3	Limited evaluation of the advantages and disadvantages of using a JIT method of inventory control for a manufacturing business.	7–8	2	Analysis and some application of the advantages and/or disadvantages of using a JIT method of inventory control for a manufacturing business.	3–6	1	Understanding of JIT / inventory control.	1–2	0	No creditable content.	0	12
