**CAMBRIDGE INTERNATIONAL EXAMINATIONS** 

**GCE Advanced Level** 

### MARK SCHEME for the October/November 2013 series

## 9706 ACCOUNTING

9706/42

Paper 4 (Problem Solving – Supplement), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

- (d) Yes (1of). Profit is higher (1of).
- (e) (i) Share issue, debentures, bank loan, disposal of surplus non-current asset debt factoring
  - (ii) Public issue
    - expensive
    - needs underwriting to ensure success
    - requires prospectus
    - dilutes control
    - no legal necessity to pay dividend in a bad year

#### Right issue

- no dilution of control
- generally cheaper
- no legal necessity to pay dividend in a bad year

#### Debenture issue/loan

- interest is always payable
- may require security/floating charge
- needs to be paid back/redeemed
- interest is charged against profit
- no votes in general meeting

#### Disposal of non-current assets

- no loss of control within ownership
- no costs/bank charges
- immediate cash
- but may lead to insufficient assets as business grows

#### Debt factoring

- immediate cash
- there is a cost associated with factoring and not all of the debt will be collected
